Abstract (Basic): JP 9201227 A

Beautifying sheet has arginic acid salt supported on a fibrous sheet.

ADVANTAGE - The sheet gives arginate to skin and wetness to the surface skin by moistening rubbing lightly or putting against skin.

Dwg. 1/5

(54) BEAUTY SHEET

(57)Abstract:

**PROBLEM TO BE SOLVED:** To form the skin having moisture and the hair having good luster when a beauty sheet used for moisture retaining of the human skin is brought into contact with the human skin and hair by carrying alginate on a fiber sheet.

**SOLUTION:** This beauty sheet is used by cutting the sheet to a fixed shape and size and is formed by depositing the alginate 2 on the fiber sheet 1. At this time, the beauty sheet is preferably formed by fixing the plural fiber sheets 1 to each other and depositing the alginate 2 between the fiber sheets 1 and more adequately depositing the alginate 2 at 10 to 40wt.% thereon. The beauty sheet may otherwise be formed by thermally adhering the ends of the circumference of the sheets to a bag form and encapsulating the alginate 2 therein. According to such beauty sheet, water is included in the sheet and a required part is lightly rubbed and putted, by which the alginate 2 is

imparted to the skin and the moisture is imparted to the skin as well. The sheet is also usable as a pack by sticking the sheet to a necessary part.
